

JINAN HONGYANG CNC MACHINERY CO., LTD

Changsheng 3.2KW (Φ 105*235) Woodworking Advertising Water-cooled Spindle Motor

 	model:	GDZ-105-3.2
	Dimensions:	Φ105*235Φm/m
	Rotating speed:	24000RPM
	power:	3.2KW
	Voltage:	220V/380V
	frequency:	400HZ
	Bearing:	Four bearings
	cooling method:	Fan cooling
	Chuck nut:	ER20
	Current:	/

1. This water-cooled spindle motor should be used with the inverter that shares the matched parameters with itself. If the settings are incorrect, the spindle motor will be burned.
2. Before every use, all the spindles in the series of [router spindle motor](#) must ensure that the cooling circulation systems of themselves are working normally. It is strictly prohibited to use the motors without cooling water.
3. During the storage and transportation of the spindle motor, the state of the high-speed grease inside the bearing will change, and the customers should run the spindle at a low speed before its first use.
