

JINAN HONGYANG CNC MACHINERY CO., LTD

HQD 3.2KW Woodworking Advertising Water-Cooled Spindle Motor

 <p>弘阳数控 HONGYANG CNC</p>	Model:	GDZ-24-1
	Dimensions:	Φ100*265ΦM/M
	Rotating Speed:	24000RPM
	Power:	3.2KW
	Voltage:	220V/380V
	Frequency:	400HZ
	Bearing:	3 BEARINGS
	Cooling Method:	WATER COOLING
	Chuck Nut:	ER20
	Current:	/

1. Like other water-cooled spindles in this series, this HQD 3.2KW woodworking advertising water-cooled spindle motor should also be used with the inverte. And the specifications of the inverter should perfectly match the concrete parameters of the spindle motor. If these settings are incorrect, the spindle motor will easily get burned.
2. Before the use of any [CNC spindle motor](#), the users must ensure that the cooling circulation system of the spindle motor is working normally. If the system is down, it is then strictly prohibited to start the water-cooled spindle motor.
3. While delivering the spindle motor, the state of the high-speed grease inside the bearing may change; thus, it is better for customers to run the spindle motor at a low speed for the first use.
