## Huajiang 4.5KW Woodworking Advertising Water-cooled Spindle Motor

 	<b>model:</b>	125 4.5KW ER25
	<b>Dimensions:</b>	Φ125*290Φm/m
	<b>Rotating speed:</b>	24000RPM
	<b>power:</b>	4.5KW
	<b>Voltage:</b>	220v/380V
	<b>frequency:</b>	400HZ
	<b>Bearing:</b>	Four bearings
	<b>cooling method:</b>	Water cooling
	<b>Chuck nut:</b>	ER25
	<b>Current:</b>	/

1. This water-cooled spindle motor should be used with the inverter. The specifications and parameters of the inverter should match the related parameters of the spindle motor. If the settings are incorrect, the spindle motor can be seriously burned.
2. Before every use, it is important to ensure that the cooling circulation system of the [router spindle motor](#) is working normally, and it is prohibited to use the spindle without sufficient cooling water.
3. During the storage and transportation of the spindle motor, the state of the high-speed grease inside the bearing will change, and the customers should remember to run the water-cooled spindle at a low speed before its first use.
