

JINAN HONGYANG CNC MACHINERY CO., LTD

Shun Tong 3.2KW Woodworking Advertising Water-cooled Spindle Motor

 <p>弘阳数控® HONGYANG CNC</p>	model:	WH100 3.2KW
	Dimensions:	Φ100
	Rotating speed:	24000RPM
	power:	3.2KW
	Voltage:	220V/380V
	frequency:	400HZ
	Bearing:	3 bearings
	cooling method:	Water cooling
	Chuck nut:	ER20
	Current:	/

1. Shun Tong 3.2kw water-cooled spindle motor should be used with the inverter that holds the matched specifications with itself; otherwise, the spindle motor will get seriously burned.
2. Before use, the water-cooled spindle motors must ensure that the cooling circulation system of themselves can work normally, and it is strictly forbidden to use the water-cooled spindle motor without enough cooling water.
3. During the storage and transportation of the spindle motor, the state of the high-speed grease inside its bearing will change. Thus, the customers should run the [water cooled spindle](#) at a low speed before its first use.
